Mosaic BOH | Two peas in a pod:

How MealViewer & Mosaic can work together

PRESENTED BY DAVID HELMES

MealViewer & Mosaic Integration

- What Is Integration?
- What Do You Need?
- How Does It Work?
- What's Next?
- Make It Yours!
- Best Practices.
- Marketing! Marketing!

Marketing!

What is MV Integration?

...

What is MV Integration?

• Easily share your menu planning information from Mosaic BOH

• Enter all menu information in one place, no duplicate data entry

• Showcase up-to-date menu information across multiple platforms

What do I need in order to sync?

....

What do I need in order to sync?

- At least one site
- Recipes
- Menus
- Up-to-date nutritional information

...

Create MealViewer Display Groups and Assign Recipes to them

> In your Mosaic Back of House, a MealViewer Display Group is created for each of your sites for the appropriate menu items to be assigned to. Display Groups control which recipes and items are shown on a school's desktop and mobile menus and on each digital display.

MealViewer Display Groups are created and recipes are assigned to them

MV Sync is enabled

MealViewer Display Groups are assigned to MV Sites

Review Menus in MealViewer

BOH Sites are mapped to MealViewer

Create MealViewer Display Groups and Assign Recipes to them

 In your Heartland Menu Planning program, a MealViewer Display Group is created for each of your sites for the appropriate menu items to be assigned to. Display Groups control which recipes and items are shown on a school's desktop and mobile menus and in each serving line.

What is a MVDG?

MealViewer Display Group

 A group of recipes served together on a serving line that you want communicated together to parents and students

CONNECT

Can I make it work without MVDGs?

Pros

- No set up required
- Sync right away
- Nutrition and Allergens are still synced

Be aware

- All recipes scheduled for a particular site will display at every site location set up in MealViewer that is mapped to it
- All or Nothing per site synced

Get MV Sync Service Enabled

 MealViewer Support will work with you to enable the MVSync at your district to connect MealViewer with your Mosaic Back of House program.

-	Edit MealViewer Sile Map / Assign	
	MKHS ×	
	Central Kitchen	
	District Warehouse	
	on Elementary	

Map your Sites to MealViewer

- Now that Mosaic and MealViewer are connected, you can map your sites!
- You'll want to properly match up your sites in MealViewer to your sites in Mosaic.

How do I make it work?

Assign MealViewer Display Groups

MealViewer Display Groups are assigned to the appropriate serving lines so you're able to share the right menus on each school's MealViewer website, mobile app, and digital signage in the cafeterias or other locations.

Review your MealViewer Data

 Lastly, you will be amazed at how easily all the data is displayed for all your district parents and students to see.

So now you're integrated. What's Next?

Tailor Your MealViewer

.11
